

PETAL+EON

We hope you love your Home Kit with REAL, eco-friendly flowers that last 1-2 years! We invite you to plan a private party.

How to design a floral arrangement that lasts 1-2 YEARS

1) DON'T PANIC! IT'S EASY!

No skill required; see our website & Instagram for samples.

2) REMOVE FLOWERS FROM PACKAGING - BE GENTLE!

Preserved flowers are more fragile than fresh flowers - touch as little as possible.

3) STICK IN THE ROSES NEAR THE CENTER OF THE FOAM

Only touch the plastic green stem fasteners - stick just far enough to hold.

4) PLAN YOUR DESIGN

Where will you put it? 360-degree alignment or 1-directional?

5) ADD THE (FLUFFY) HYDRANGEA TO HIDE FOAM

Stick hydrangea stems into the floral foam low and around the vase.

TIP: CREATE HYDRANGEA "BED"

Similar to the green hydrangea above, keep the hydrangea short and below the roses to not overwhelm the roses.

6) ADD DECORATIVE FILLERS

Stick the other flowers into the foam (no need to use them all); blend in or create contrast; cut stems to adjust height.

7) NO MAINTENANCE

Keep dry at room temp; best to reduce sun and humidity; do not eat*. The flowers will dry out/wilt over 1-2 years.

8) POST TO SOCIAL MEDIA

Please follow us and join our newsletter; post to win a Home Kit!

** Consult a medical professional if ingested; keep away from children because small pieces may cause choking; may be flammable.*
